

ATECAP

ITALIAN TECHNICAL ECONOMIC ASSOCIATION
FOR READY-MIXED CONCRETE

legality, qualification, safety,

Atecap is the twenty years old house of Italian fair and qualified producers of ready-mixed concrete

Atecap is the Association that defends and supports the interests of the entrepreneurs who respect the rules and work correctly, leading their own actions and behaviours to ethical and deontological principles. Companies that join Atecap represent more than 70% of the national production.

With the adoption of the Ethical Code and Code of Conduct, Atecap members are committed, de facto, to follow patterns of behaviour based on transparency, autonomy, integrity and ethicality.

Atecap members are adopting internal procedures of suppliers qualification based on ethical profiles, in order not to start or maintain business relationships with suppliers not eligible to pass the qualification process.

In this framework the Qualification Guidelines have been playing a key role for the qualification of trading partners ethical reliability.

Atecap provides information, communication and business consulting

Atecap supports member companies in all kind of technical, regulatory and market issues.

Atecap is the "home" of the concrete producers and the best place for sharing experiences, production analysis and market forecasts.

Atecap is also the Association in charge of possible solutions regarding the trade development.

Atecap companies are non-stop informed by newsletter, institutional website and specific activities of direct assistance on technological, legal, fiscal and economic issues.

Atecap main discussion themes regard the technical standards evolution, provisions of law related to environmental protection, workplace safety, qualifying and market trend.

Moreover Concrete Srl, Atecap in-house service company, is in charge of providing additional information and training services.

Atecap promotes the concrete producers interests

Atecap joins Ermco, the European Ready-Mixed Concrete Organization, with a real effort in implementing the European technical legislation, in order to give the opportunity to improve the competitiveness among the Italian producers.

Atecap is member of Federbeton, the Federation of Confindustria (the most important Trade Federation in Italy) that collects the concrete and cement chain of companies. Atecap is represented by Federbeton within Federcostruzioni, the organization of associations and federations coming from the construction and infrastructure market.

Atecap has also promoted the establishment of the Council for the Concrete, a technical and promotional organization that involves different actors within the concrete sector and cooperates with the world of fairs.

Atecap has developed numerous initiatives in collaboration with public and private institutions through agreements and memoranda of understanding.

One of the most important privilege entrusted to Atecap regards the technical secretariat of the Observatory of the Concrete and Reinforced Concrete, established inside the Italian Council of Public Works.

Besides Atecap is present within the Assessment Commissions of many Organizations in charge of the release the the FPC certification.

Atecap pursues the path of legality, safety, innovation and product value

Atecap stands out for its own activities dedicated to promote production and use of a high-level concrete, training concrete producers on the utilization of specific guidelines aligned with regulation standard and providing customers the fitting tools for a design that takes into account the requirements of durability.

Atecap promotes and implements the most important initiatives in order to spread a culture of concrete construction based on a widespread and specific application of the balance between technical characteristics and conditions of use, in accordance with the statutory rules of building design, manufactures and installations made of durable concrete.
